EXAMINER'S AMENDMENT*Amdt/prop*

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows: in the specification, on page 2, line 25, after "non-provisional App. No." enter -10/794,634-- ✓

REASON FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance: the claims are allowable over prior art of record, because none of the references in alone or in combination discloses:

An optical apparatus, comprising an optical element having formed therein at least one set of diffractive elements and at least two channel optical waveguides, each channel optical waveguide having a corresponding first end and substantially confining in two transverse spatial dimensions an optical signal propagating therein, wherein:

- diffractive elements of each set of diffractive elements are distributed among diffractive element subsets corresponding to each of at least two of the channel waveguides;

- each diffractive element set routes, between a corresponding pair of optical ports, those corresponding portions of an optical signal propagating within the optical element that are received by at least two of

the channel waveguides and back-diffracted within the receiving channel waveguides by corresponding diffractive element subsets;

- the channel optical waveguides are arranged so that an optical signal entering the optical element at an input optical port first propagates through a region of the optical element between the input optical port and the first ends of the channel waveguides and is then incident on and received at least in part by the corresponding first ends of at least two of the channel optical waveguides; and

- the channel optical waveguides are arranged so that the corresponding routed portions of optical signal exiting the optical element at an output optical port first propagate through a region of the optical element between the first ends of the channel waveguides and the output optical port.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
